

THE MASTER OF SPACE!

ENGLISH

THE GAME

Aliens have invaded sectors using Zil rays. These sectors are now contaminated. You have to use heavy-OX to be able to destroy the alien crafts flying over huge warships. But this substance is so heavy that your spaceship "The Fighter" cannot carry heavy-OX for more than one minute and so need to refuel regularly.

HOW TO PLAY

The game consists of three missions that you can choose from the menu:

Learning

It's a training mode, easier than the other missions with no obstacles to avoid when you are flying over the warships. Your aim is to reveal the letters of the word "DONE". You get a letter for each level completed.

Master

The main mission. Your aim is to reveal the letters of the word "SPACE". You get a letter for each level completed. Beware of deadly obstacles as you are flying over the warships.

Extra levels

Three level more. Just kill everything but be warned that only experiment pilots should try it!

On main screen, press fire or spacebar to start game. You control your ship using the cursor keys and spacebar or with your favorite joystick.

To complete a level, kill everything! Each time you complete a level, a password is given that permits you to access the next one later.

Some alien crafts, when hit, drop equipment boxes which give you one minute more of heavy-OX and new fire power. These boxes are vital, so when your ship finds one it immediately stops you shooting so that you cannot ignore the scanner pointing in the direction of the floating box. To pick it up, fly right over it slowly.

Also, a single rocket will not kill you but keep an eye on your shield gauge or you will be destroyed soon. You get an extra life each time a level is completed.

WEAPONS

There are 4 levels of standard weaponry. When you have reached the maximum level, you get special weapons. Each time you lose a life, you lose all your special weapons too.

INGAME MENU

Press the "P" key to enter the menu while playing and select an option :

OUT	Quit current game.
PAUSE	Resume game.
CODES	Type a password using the keyboard.
JOY/KBD	Choose between joystick and keyboard to play.

PASSWORDS

When you use a password, you start the selected level with basic weapon, making your mission more difficult. But you can begin from an easier level, collect some equipment boxes to upgrade your weaponry and then enter a password to jump to another level. You will lose your score but restart with all your lives and the actual weaponry.

ADVICES

- Stay at bottom of level one until you have collected two equipment boxes.
- Side rockets can be more useful than forward ones.
- Beware of the explosion when you destroy an alien craft.
- You can fly full speed but it is not always the best option.
- Heavy aliens are easier to kill with at least one special weapon.
